FROM THE PRESIDENT

To the Case Western Reserve University Community:

Typically we take the occasion of our annual report to tell others about the highlights of the previous dozen months.

This time, we're letting *them* tell our story.

From *The New York Times* to National Public Radio, *Forbes* to *Fortune*, Case Western Reserve drew notice all over mainstream media this year. The university was even more ubiquitous across social media sites like Facebook, Twitter and Instagram.

Organizations like Accenture and Microsoft, Cleveland Clinic and the Cleveland Metropolitan School District all applauded innovations like the holographic anatomy curriculum now under development, or the dental school's efforts to provide well-fitted mouth guards to local student-athletes.

In addition, Professor Peter Shulman's insights @HistOpinion and Professor Brooke Macnamara's second look at the 10,000-hour rule drew national interest in the work of our faculty. Meanwhile, Northeast Ohioans took to social media to herald the opening of a new human trafficking law clinic.

You will see how those accomplishments were shared, liked and posted in the pages that follow. You also will learn how viewers responded to the Violins of Hope performance at the opening of The Maltz Performing Arts Center, how Adam Savage was awed by Sears think[box] in the Richey-Mixon Building, and how our partnership with Cleveland Clinic made the Health Education Campus groundbreaking possible.

Best of all, thousands of others did the talking for us.

To them, and to all of the members of our community who inspired them, let me just say thank you—and congratulations.

A handwritten signature in black ink that reads "Barbara R. Snyder". The signature is fluid and cursive.

Barbara R. Snyder

IN OTHERS' WORDS

At Case Western Reserve University, 2015–16 was a year of conducting life-changing work, breaking new ground and exceeding even our highest expectations.

But don't take our word for it.

This year, stories about our faculty, staff, students and entire campus appeared more than **41,500** times in local and national media and **110,000+** times on Twitter, Instagram, Facebook, blogs and more.

See how people shared our story—through national headlines and viral posts, in photos and videos, and, often, in 140 characters or less.

mattshifflerphoto Overtime detail [as a Case Western Reserve police officer] this week consisted of protecting the priceless violins used and restored from the Holocaust. Sometimes police work intertwines with some really interesting subjects.

[As a "Violins of Hope" brochure puts it:] "When a visitor first brought Israeli violin maker Amnon Weinstein a violin for repair, explaining that it had helped him survive the Holocaust as he played for Nazi soldiers in the death camps, Weinstein saw only ashes. The ashes of Weinstein's own 400 family members who did not survive the Holocaust.

"Three decades later, in 1996, Weinstein was ready to take on the project—one to which he would dedicate his life as he tracked down more and more of the violins Jewish musicians played during the Holocaust to sustain hope and life, often in death camps where musicians were accorded some privileges, including the privilege of life." #casewestern #police #violinsofhope #thisiscle

Ashlee Scaramozzino

@figelelyn

Though I've been home for several hours, I still hear violins—Violins of Hope—echoing through Silver Hall at The Temple-Tifereth [Israel.]

Maltz Museum of Jewish Heritage

"Beyond that, [playing instruments recovered from the Holocaust and restored] demonstrated irrefutably that art always trumps hatred and violence."

Congrats to Cleveland Orchestra & Case Western Reserve University. Such a powerful performance and a great Violins of Hope Cleveland kickoff.

It's official: **Testing rape kits** prevents assault and saves everybody millions

—Forbes

THE NEW YORK TIMES

Rape kit tests in Ohio find more than half of sexual assaults committed by serial rapists

After a test of 5,000 backlogged rape kits that had been taken between 1993 and 2010, scientists in Ohio have discovered that more than half of the sexual assaults studied were tied to serial offenders.

THE PLAIN DEALER

What local research about rape kits could mean for stopping serial rapists

Emerging research suggests that every sexual assault report should be investigated as a possible serial offense—shifting the focus to the accused, rather than treating reports as single incidents. “Police officers tend to look at a rape report in terms of how can I make this case,” said Rachel Lovell, a senior researcher with the Begun Center for Violence Prevention at Case Western Reserve University. “What needs to happen is they need to ask: **What else has this guy done?**”

News 5 Cleveland

Testing nearly 5,000 forgotten and backlogged rape kits in Cuyahoga County has led to indictments, prosecutions and more than 250 convictions.

📡 Cleveland football players receive customized mouth guards

—WOIO, Cleveland 19

Players often share store-bought guards that injure their mouths, fall out and harbor harmful bacteria. "The custom mouth guards cushion blows during tackling and keep teeth from coming together fast and hard, which can result in a variety of injuries," said James Lalumandier, chair of the Department of Community Dentistry.

ADA NEWS

Mouth guard program perfect fit for Cleveland dental society volunteers

Volunteers from the dental society and students from Case Western Reserve School of Dental Medicine provided more than 60 Cleveland public high school athletes with mouth guards—made complete with the colors and nickname of their respective schools, along with a dental exam and education on how to properly use and store a mouth guard.

Cleveland Metropolitan School District

Before football players from three CMSD high schools took the field this season, the Greater Cleveland Dental Society provided them with free examinations and fitted them for customized mouth guards.

AUGUST 2015

CLEVELAND.COM

Concern about dental protection leads to Senate Athletic League football players receiving free custom mouth guards

"They took the time out of their day to make sure we have the proper mouth guards for football," said John Hay senior safety/receiver Treyvon Akins (in background). "It felt good to know someone cared about us."

Among elite athletes, practice isn't everything

—Yahoo! News

JUNE 2016

NEW YORK MAGAZINE

10,000 hours of deliberate practice aren't going to get you Olympic gold

There's more evidence that the 10,000-Hour Rule is more of a rule of thumb than a law of the universe. It comes in the form of a new meta-analysis lead-authored by Case Western Reserve University psychologist Brooke Macnamara, whose team ... found that, on average, deliberate practice accounted for 18 percent of the difference in performance.

The Conversation US

While you've heard the adage "practice makes perfect," practice doesn't necessarily make an Olympian. Case Western Reserve psychology professor Brooke Macnamara explores all the little things—beyond practice—that go into becoming an Olympic athlete.

THE HUFFINGTON POST

Sports practice accounts for just 18 percent of differences in performance

"While practice is necessary for elite athletes to reach a high level of competition, after a certain point, the amount of practice essentially stops differentiating who makes it far and who makes it to the very top," Macnamara explains.

SCIENTIFIC AMERICAN

No one wins gold for practicing the most
